

Week 2 - Summary

The Idea Funnel (0 → 100 → 20 → 5)

- **0:** Set idea strategy
- **100+:** Brainstorm freely
- **20:** Filter through strong criteria
- **5:** Select and develop the best

Strategy: What Should I Make?

80/20 Rule

- **80%** = Mass appeal (core audience)
- **20%** = Experiments (for you)
 - ✓ Ask: Would 80% of my top viewers click?

CCN Framework

- **Core:** Loyal fans (first cohort for whom your video will be pushed)
- **Casual:** Regular watchers
- **New:** Never seen you
 - ✓ Growth requires hitting all 3, not just Core

Where Great Ideas Come From

1. Internal Hits

- Look at your top videos from last 2-3 years then repeat, twist, or upgrade them

2. External Outliers

- Study breakout videos (3× avg views) in your niche + adjacent niches
- Use tools like 1 of 10, ViewStats, vidIQ (free extension)

3. Innovation

- Blend formats, explore gaps in your niche, use AI to spark new ideas

Target mix: **40% Internal / 40% External / 20% Innovation**

✅ **Criteria: Narrow Down to the Best**

Score your top 10 ideas using **3–6 filters** like:

- Is it feasible?
- Does it excite me?
- Could it hit X views (we like to target 1M, but it depends on the size of your TAM)?
- Strong title & thumb idea?
- Does it hit Core, Casual, and New?

Only **10–20%** of ideas should pass.

📁 **Build Out the Winning Idea**

For the one you choose:

- Sketch thumbnail
- Draft 1–2 title ideas
- Write 1-line logline
- Outline video structure
- Ask: Who is this for, and how much effort is justified?

📊 **Smart Upload Strategy**

Sandwich Strategy (for experiments)

✅ Proven → Risky → Proven

→ Keeps algorithm happy while you try new stuff

Bridge Strategy (for pivots)

✅ Current → Transitional → New

→ Warms audience into niche shifts

💡 **Growth Phases**

1. **Establish** – Use what's worked
2. **Experiment** – Try bigger swings
3. **Double Down** – Scale what hit
